

NGUYEN NGOC MAN

Senior Backend Engineer (Java / Spring / Cloud) - Ho Chi Minh City, Vietnam

+84 792 887 666 mannguyen.dev@gmail.com mannguyen-dev github.com/mannguyen-dev

SUMMARY

Senior Backend Engineer with 5 years of experience developing scalable backend systems and APIs for banking, insurance, and large-scale enterprise platforms. Strong expertise in Java, Spring Boot, microservices, and distributed systems, with hands-on experience in cloud-native and DevOps-oriented environments. Comfortable working across the full development lifecycle and collaborating with Product, QA, and international teams in Agile environments.

CORE TECHNICAL SKILLS

- Languages:** Java, Python, SQL, JavaScript
- Backend & Architecture:** Spring Boot, Spring MVC, JPA/Hibernate, REST APIs, Microservices, DDD, Clean Architecture, SOLID, Design Patterns
- Messaging & Integration:** Kafka, ActiveMQ, event-driven architectures
- Caching & Performance:** Redis, data caching strategies, performance optimization in distributed systems
- Cloud & Infrastructure:** AWS (Lambda, SQS, EventBridge, DynamoDB, S3, CDK), Docker, Kubernetes, OpenShift
- Databases:** PostgreSQL, MySQL, SQL Server, MongoDB
- CI/CD & DevOps:** Git, GitHub Actions, Jenkins, CloudWatch
- Testing & Quality:** JUnit, Mockito, Postman, JMeter, SonarQube, Veracode
- AI-Assisted Engineering:** GitHub Copilot, OpenAI Codex, MCP (Model Context Protocol), Agent Workflow Automation, AI-assisted Code Review, Debugging, Documentation, and Development Productivity Optimization
- Ways of Working:** Agile (Scrum, Kanban), Jira, Confluence

EXPERIENCE

Global Automotive Service Provider Client | FPT Software Apr 2025 - Present

Senior Backend Engineer | Project: User Notification System Modernization

- Designed and developed a cloud-native notification platform on AWS, supporting 1M+ events/day with improved reliability and scalability.
- Built event-driven serverless services using AWS Lambda, SQS, EventBridge, and DynamoDB, reducing manual processing by 70%.
- Automated CI/CD with AWS CDK and GitHub Actions, reducing deployment time to under 30 minutes.
- Integrated SonarQube, resolved 100+ security/code quality issues, and upgraded dependencies to improve maintainability and compliance.
- Established monitoring and alerting with CloudWatch and Slack, reducing incident detection time by 50%.

Large Singapore Banking Client | DXC Technology

Jan 2024 – Mar 2025

Backend Engineer | Project: Banking Teller Platform Development

- Developed 5 core backend services for a digital banking teller platform using Java Spring Boot andDDD, supporting daily operations across multiple branches.
- Integrated Kafka-based messaging into distributed microservices, processing real-time cash flow, ATM, and audit events per day.
- Contributed to architecture discussions and performed code reviews per quarter to maintain clean architecture and reduce production issues.
- Supported 5+ major releases across the full development lifecycle, from requirements analysis to production deployment and incident handling.
- Deployed services on OpenShift with Jenkins CI/CD, and monitored production systems using Kibana, reducing deployment and maintenance effort by 60%.

Global UK Insurance Client | DXC Technology

Oct 2021 – Dec 2023

Backend Engineer | Project: Batch System Modernization

- Modernized legacy modules (C, VB6, Lotus Notes) into scalable Spring Boot microservices, improving maintainability and reducing manual operations.
- Used SQL Server and MongoDB solutions for and supporting 100K+ batch records per day for reporting surveyors' data and business processing.
- Automated deployments with Jenkins and Kubernetes, reducing deployment time and improving release stability.
- Worked with BA and QA teams to ensure clear requirements and on-time releases.

LEADERSHIP

- Technical owner for 3+ core modules, contributing to architecture decisions, code quality, and delivery across multiple releases.
- Mentored 3+ junior engineers and conducted 50+ code reviews per quarter to maintain engineering standards and reduce rework.
- Used GitHub Copilot, Codex, and MCP workflows to improve development efficiency by 20–30% and accelerate debugging and code reviews.
- Collaborated daily in English with international Product, QA, and Engineering teams for technical alignment and delivery.

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate (Mar 2026)
- AWS Certified Cloud Practitioner (Nov 2025)
- Microsoft Certified: Azure AI Engineer Associate (Dec 2024)...

EDUCATION

- B.S. in Information Technology - University of IT, VNU-HCM | 2021 - 2023
- B.S. in Chemistry - HCMC University of Pedagogy | 2013 - 2017
